Japan Grown Lilium Longiflorum.

Japan Lilium Longiflorum have proved a most desirable substitute for Lilium Harrisii, because of their comparative freedom from disease, as well as being unmixed with the latter variety. While they are later blooming than Harrisii, florists should experience no trouble to bring them into flower in good time for

Japan Grown Longiflorum Giganteum Multiflorum.

Florists have no doubt noticed in Japan Lilium Longidorum an occasional plant much different from others, taller in growth, with handsome foliage which covered the stem from the pot up, and producing much more abundantly of flowers than its neighbors. This is the variety, GIGANTEUM MULTIFLORUM, true stock of which has been most difficult to secure. We have, however, this year, a few thousand of the sizes mentioned below. Our Japan grower assures us that these are true to name and can be expected to produce thirty to fifty per cent more thousand than the common Japan Lowers than the common Japan Lowers (florium). flowers than the common Japan Longiflorum.

SPIRAEA.

The popularity of the Spiraea has been of late years decidedly on the wane, however, since the introduction of the grand variety "Gladstone" a new impetus has been added to the demand. THE FAMOUS "THREE SIXES" LIFE SIZE.

NEW AGERATUM, STELLA GURNEY.

This is the finest of all dwarf Ageratums. Short, compact growth 6 to 8 inches high. The individual tufts are very large and dense and the color is the most intense blue we have ever seen in Ageratums. It is a thrifty grower and will bloom all winter as a pot plant. As a bedding plant, it is without an equal. Strong plants, 3 inch pots, each, 10c.; per doz., 75c.; per 100, \$6.00.

NEW CARNATION, NO. 666.

The largest finest and best Carnation ever offered to the trade, having more good points than any Carnation we have ever before seen. No. 666 has been awarded the highest honors wherever shown. Its habit is, as has been stated by all Carnation growers that have seen it growing, nearest to the ideal yet produced. It makes no useless grass, but goes straight up to bloom; one shoot follows the other continuously, and will attain a height of four feet by January 1st. under no special culture. It is not subject to any of the diseases that attack Carnations, and altogether it is a clean, healthful, and exceptionally strong grower. The introducers modestly claim that No. 666 is the largest perfect Carnation ever offered—four inches in diameter. The color is entirely distinct and does not conflict with varieties now on the market. The ground color is white, overlaid with pink in mottles deepening to center, reminding one of the beautiful tints seen in Azaleas and Rhododendrons.

FERN BALL BEFORE WATERING (dormant.)
About 8 inches in diameter.

the home, conservatory or greenhouse.

DIRECTIONS FOR STARTING.—Place Ball in water for 15 minutes, and then suspend in any desired position. Repeat every two days until growth is started, after which water occasionally as required. THE GRAND NEW ROSE "LIBERTY."

This New Rose marks the limit of glorious deep, yet bright coloration in a family by no means deficient in warm rich hues of crimson-red. Most nearly approached by Meteor in color, this newcomer surpasses that standard variety in purity, being without the tendency to blacken, that Meteor exhibits, and also the blue cast sometimes seen on the fully expanded petal of Meteor has not been detected in any degree whatever upon a single one of many critically examined blossoms of Liberty. To the practical grower, too, this novelty will surely appeal, because of the greater ease of cultivation, in that it does not exact a temperature in excess of that generally accorded to other roses when grown under glass. There can be but little doubt that "Liberty" is destined to rapidly become the one dark flowered rose for both commercial and

Price, 21/2-inch pots, per doz., \$2.00; per 100, \$15.00; per 1000, \$100.00.

The New Hardy Rose Princess of Naples.

A cross between Captain Christy and La France. The plants grow very solid and compact, and stronger than those of Captain Christy; have more spines and very dense, healthy, large, dark green foliage. It flowers very freely and easily, and keeps on flowering for a long time. The flowers are of good form; solid, but nevertheless of very loose, graceful appearance; color, delicate, satiny pink. The fragrance is excellent; better, stronger and more agreeable than that of La France. The whole plant is covered with flowers in the main flowering season. The fact that the plant grows so easily makes it especially suitable for early and late forcing and cut flower purposes; also for pot plants and outdoor work.

Price, 2½-inch, per doz, \$1.50; per 100, \$10.00. 4-inch, per doz., \$3.00; per 100, \$20.00.

NEW ROSE-CORONET.

Sweetest, largest and freest blooming Pot Rose in cultivation. A cross between Paul Neyron and Bon Silene. Flowers measure from 4 to 6 inches in diameter; form is full, deep, and very double. In bud the color is a deep, rich carmine, which, as the flowers open, lightens to a soft pink. Fragrance of the Bon Silene.

NEW MAMMOTH FLOWERING ALLEGHENY HOLLYHOCKS.

Bloom the First Year from Seed. A New Type of Hollyhocks.

The flowers of this new variety are so different from the Chater's that but for the similar habit of the plant it would not be taken for a Hollyhock. They are from tour to six inches in diameter, running from semi-double to double, and are finely fringed and curled. The colors are shell pink, rose and ruby red, a shade or two deeper at the center, and exquisitely tinted towards the edge. The flowers do not, as on the double Hollyhocks, rot on the stems, but drop as soon as they fade. Every bud to the top of the plant is developed into flowers, making the flowering season considerable longer. Trade pkt., 15c.; ½ oz., 40c.; oz., \$1.25

most profitable plants to grow for cutflowers. An eastern Florist planted 10,000 for that purpose. It begins to bloom in three months after sowing and continues to produce flowers for ten months in succession. The

flowers are very graceful, not quite half an inch across and are of a most pleasing rose color with a yellow eye. They are borne on erect stems, 10 to 12 inches high, in tiers, and remain fresh for over

a week after being cut, new buds opening every day. The plant is a vigorous grower, thrives in the shade or sunshine, even in a cool house.

THE CLARA CEMETERY VASE. -It is one of the most useful,

as well as handsome articles ever placed on the market. Of beautiful solid mounted glass, 12 inches high. It takes the place of all the old tin cans, bottles, and like unsightly receptacles often used in the cemetery where only the attractive and ornamental should be seen. The lower end is sharp-pointed so it can be embedded about six inches in the ground and stand firm. It will hold sufficient water to keep the flowers fresh and sweet, and will accommodate flowers with long as well as short stems. The vase is bell shaped and the top has a diameter of about five inches.

The CLARA VASE, boxed, per doz., \$3.50.

The CLARA VASE, in barrel lots, per bbl., (3 doz.) packing included, \$10.00.

FERTILIZERS.

Please Note.—Prices on Bone Meal, Vaughan's Rose Grower Bone and Lawn Fertilizer are f. o. b. Chicago. If to be shipped from New York we charge at the rate of 30c. per 100 lbs, extra, or \$5.00 per ton on lots of 1000 lbs, or over. Fruit trees and vines to thrive require plenty of well balanced food. If the food is not in the soil of the orchard or field it will have to be put in. The necessary elements of plant food which are likely to be exhausted are Nitrogen, Phosphoric Acid and Potash. Barnyard manure and Commercial Fertilizers both contain these elements. Commercial Fertilizers contain them in more concentrated, available, better balanced form. Barnyard manure is out of balance—does not contain enough of the mineral elements. There are great differences in Fertilizers as there are in every kind of merchandise.

Vaughan's "ROSE GROWER" Bone Meal.-This is a special

brand we have put up for the trade. It is ground fine hence acts quickly. Free from acid, very white in appearance, and a superb article. It is made from bone accumulated in large slaughter houses, and should not be compared with the Bone Meal made from cattle heads and feet gathered on the western prairies. Our "Rose Grower" bone has been slightly steamed to soften it so it can be ground fine, and is thus quicker in its action. The finer bone is ground the quicker the mild acid thrown out can be dissolved by the tiny roots of the plants and made use of as food. A finely ground bone can also be more evenly distributed through the soil. ANALYSIS.—Aminonia, 4½ to 5½ per cent. Total phosphoric acid, 22 to 25 per cent. Total bone phosphate, 48 to 54 per cent.

Adjustable Plant Stand.

This is one of the most useful contrivances a Florist can have, not only tor decorating but for permanent conservatory and greenhouse use. The moderate price and durability of this stand is causing them to make their way into all sorts of establishments. lishments.

lishments.

The special merits of this stand may be briefly enumerated as follows: The three feet cause it to stand firmly on a carpet or uneven floor. The upright is of three parts telescoped, being easily adjusted to various heights, fastened by means of thumb screws which are well made. The top flange will hold any ordinary pot upright or by using the four pronged crotch attachment, a pot can be piaced on its side at two different angles, a very useful contrivance for tempolary decorations.

angles, a very useful contrivance for temporary decorations. Where large plants weighing two or three hundred pounds are to be elevated, three stands placed close together carry them safely, although the floor itself may be uneven. Four of them are useful for holding a temporary table or platform. While possessing a number of advantages over any other stand in the market the price is lower.
